

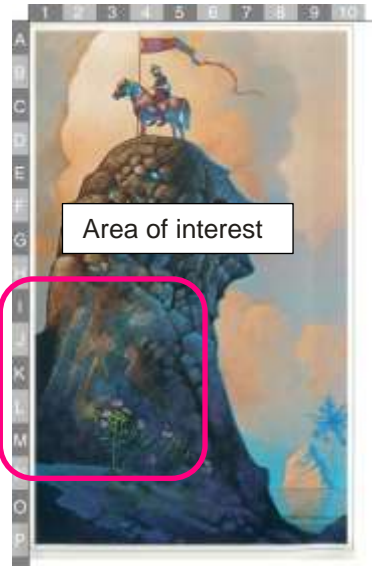

Image 6: Dig spot visualized in image

Enlarged, rotated

Area of interest

In this image from your proposed solution spot we see:

- A larger tree (the pine) and a thinner, tall tree.
- With "tall grasses" at the base.
- The green picket fence.
- The fountain.
- The dome of the planetarium.

I believe this scene from image 6 is a stylized representation of your proposed dig spot.

Here we have the two trees.
Hints of a picket fence.

And behind that:
A shape strikingly similar to the old version of the fountain (with the taller urn-shaped top)

With a hint of a moon-like orb behind it. The planetarium.

It's a stretch, but if I'm feeling especially optimistic, I'd say The flowers are kind of like tall grasses and can see an arrow pointing to the spot.
